3D CHOCO FIGURES

TERMOFORMATI

Kit di stampi termoformati riutilizzabili creati dai designer di Silikomart per la realizzazione di soggetti 3D in cioccolato.

Reusable thermoformed moulds kits created by Silikomart designers for the creation of 3D chocolate subjects.

Kit de moules thermoformés réutilisables créés par les designers de Silikomart pour la réalisation d'un sujet 3D en chocolat.

Modo d'uso:

- 1 - Riempire gli stampi con il cioccolato temperato quindi capovolgere lo stampo su una griglia e lasciar colare il cioccolato in eccesso. Ripetere l'operazione fino ad ottenere lo spessore desiderato.
- 2 - Lasciare lo stampo capovolto sulla griglia fino a completa cristallizzazione del cioccolato (circa 4 ore).
- 3 - Una volta che il cioccolato si è rappreso sformare sbattendo delicatamente gli stampi sul piano di lavoro, i vari componenti in cioccolato si staccheranno facilmente. Qualora non accadesse esercitare una leggera pressione sullo stampo spingendo la sagoma in cioccolato verso l'esterno.
- 4 - Incollare i componenti tra loro utilizzando del cioccolato fuso o scaldandone le estremità con un rapido passaggio su una teglia calda.

How to use:

- 1 - Fill the moulds with tempered chocolate then turn the mould upside down on a grid. Repeat the process until you will get the aimed thickness.
- 2 - Leave the mould upside down on the grid until the chocolate is completely crystallized (about 4 hours).
- 3 - Once the chocolate has set, unmould by gently tapping the moulds on the working surface, the chocolate components will come off easily. If this does not happen, apply a light pressure on the mould by pushing the chocolate shape outwards.
- 4 - Stick the components together using melted chocolate or warm up the edges with a quick passage on a hot baking tray.

Mode d'emploi:

- 1 - Remplir les moules de chocolat tempéré puis retourner le moule sur une grille et laisser couler l'excès de chocolat. Répéter l'opération jusqu'à obtenir l'épaisseur souhaitée.
- 2 - Laisser le moule à l'envers sur la grille jusqu'à cristallisation complète du chocolat (environ 4 heures).
- 3 - Une fois que le chocolat a cristallisé, démouler en frappant doucement les moules sur la surface de travail, les différents composants de chocolat se détacheront facilement. Si cela ne se produit pas, appliquer une légère pression sur le moule en poussant la forme de chocolat vers l'extérieur.
- 4 - Coller les composants ensemble à l'aide d'un peu de chocolat fondu ou en chauffant les extrémités avec un rapide passage sur une plaque chaude.

Liquid Sugar Paste di i78 è l'innovativa pasta di zucchero a colata. Quando si utilizza la classica pasta di zucchero da copertura è molto importante stenderla in modo uniforme, evitando antiestetiche grinze e senza lavorarla troppo perché diventerebbe appiccicosa e non liscia. Liquid Sugar Paste di i78 risponde a queste necessità: è un gel bianco pronto all'uso dalla consistenza densa che può essere colorato e aromatizzato secondo le proprie esigenze. In poche semplici mosse sarà possibile ricoprire in modo perfetto qualsiasi tipo di torta. Con il prodotto avanzato è possibile sia preparare della pasta di zucchero da modellaggio sia della crema al burro da decorazione.

Liquid Sugar Paste by i78 is the innovative pouring sugar paste. Using the classic sugar paste for cake coverage it is very important to spread it evenly, avoiding unsightly wrinkles and without working it too much because it would become sticky and not smooth. Liquid Sugar Paste by i78 meets these needs: it is a ready-to-use white gel with a thick consistency that can be colored and flavored according to your needs. In a few simple steps it will be possible to perfectly cover any kind of cake. With the leftover product it is possible to prepare both modeling sugar paste and decoration buttercream.

Liquid Sugar Paste de i78 est l'innovante pâte à sucre liquide. Lors de l'utilisation de la pâte à sucre classique pour le recouvrement, il est très important de l'étaler uniformément, en évitant les inesthétiques plis et sans trop la travailler car elle deviendrait collante et non lisse. Liquid Sugar Paste de i78 répond à ces besoins: c'est un gel blanc prêt à l'emploi de consistance épaisse qui peut être coloré et aromatisé selon vos besoins. En quelques étapes simples, il sera possible de recouvrir parfaitement tout type de gâteau. I Coloranti alimentari idrosolubili e liposolubili in polvere sono ad alta concentrazione e ad alto potere di pigmentazione. Grazie all'alta qualità del colorante, sarà sufficiente una piccolissima quantità per colorare paste di zucchero, marzapane, glassa, meringa, cioccolato, mousse, glasse e molto altro.

The water-soluble and fat-soluble food colors in powder are highly concentrated and they have a high pigmentation power. Thanks to the high quality of the product, a very small amount will be sufficient to color sugar paste, marzipan, icing, meringue, chocolate, mousse, icing and much more.

Les colorants alimentaires en poudre hydrosolubles et liposolubles sont très concentrés et ont un haut pouvoir pigmentant. Grâce à la haute qualité du colorant, une très petite quantité suffira pour colorer la pâte à sucre, la pâte d'amande, le glaçage, la meringue, le chocolat, la mousse, le glaçage et bien plus encore.

Non altera in nessun modo il sapore delle pietanze in cui viene utilizzato ed è completamente vegetale.

ISOMALTO

L'isomalto è un sostituto naturale dello zucchero. Si tratta di un disaccaride composto dai due zuccheri glucosio e mannitolo. L'isomalto non ha l'indesiderato "effetto di raffreddamento" (cooling effect) proprio di altri zuccheri alcolici. Può essere utilizzato anche per la scultura di zucchero ed alcuni lo preferiscono in quanto cristallizza più lentamente. È trasparente (in questo differisce dal caramello) quindi potete lasciarlo così o colorarlo (aggiungendo dei coloranti in gel prima di scioglierlo). Il sapore è uguale a quello del normale zucchero. Raffreddandosi più lentamente del caramello, si ha un po' più di tempo per modellare le decorazioni.

Isomalt is a natural substitute for sugar, which is mainly used for its physical characteristics similar to those of sugar. Isomalt is a disaccharide composed of two sugars glucose and mannitol. The isomalt can be dissolved either in the microwave or in a pan with double bottom. Isomalt is transparent (this differs from caramel) then you can either leave as it is or colour it (put the gel colour before it is dissolved). The flavour is equal to that of regular sugar. It cools more slowly than caramel and you have a little more time to shape the decorations.

L'isomalt peut également être utilisé pour la sculpture du sucre et un peu le préfère à sucre parce qu'il cristallise plus lentement. L'isomalt est transparent (ceci diffère de caramel) alors vous pouvez laisser aussi ou le colorer et mettre le gel colorant avant la dissolution. L'arôme est égale à celui du sucre ordinaire. Il est vrai qu'il se refroidit plus lentement que le caramel, donc vous avez un peu de plus de temps pour façonner les décorations.

GOMMA DI XANTHANO

Utilizzata come emulsionante e addensante per tutti i tipi di alimenti, dalle salse fino ai dolci e bevande.

Spume e mousse: in ricette dolci come la panna montata, la meringa o anche mousse ne aumenta la stabilità, facendole "scendere" più lentamente. In questo caso, 1g per litro sarà sufficiente.

Gelati: è un'opzione perfetta per aumentare la sua consistenza, poiché è necessario usare meno grassi nelle ricette. Agisce anche come emulsionante, favorendo la formazione di microbolle d'aria che conferiscono volume e leggerezza al gelato.

Dolci e prodotti da forno o pasticceria: ti sarà di grande aiuto per aumentare la compattezza e migliorare la consistenza di qualsiasi pane, dolce, biscotto o torta che vorrai preparare.

Used as an emulsifier and thickener for all kinds of foods, from sauces to desserts and drinks.

Foams and mousses: in sweet recipes such as whipped cream, meringue or even mousses it increases their stability, making them 'go down' more slowly. In this case, 1g per litre will be sufficient.

Ice cream: this is a perfect option to increase its consistency, as less fat needs to be used in recipes. It also acts as an emulsifier, favouring the formation of micro air bubbles that give ice cream volume and lightness.

Sweets and baked goods or pastries: it will help to increase the firmness and improve the consistency of any bread, cake, biscuit or pie you wish to prepare. Utilisé comme émulsifiant et épaississant pour toutes sortes d'aliments, des sauces aux desserts et aux boissons.

Mousses: dans les recettes sucrées telles que les crèmes fouettées, les meringues ou même les mousses, il augmente leur stabilité, ce qui les fait "descendre" plus lentement. Dans ce cas, 1 g par litre sera suffisant.

Crème glacée: c'est une option parfaite pour augmenter sa consistance, car il faut utiliser moins de matières grasses dans les recettes. Il agit également comme un émulsifiant, favorisant la formation de microbulles d'air qui donnent à la crème glacée volume et légèreté.

Sucreries et produits de boulangerie ou de pâtisserie: il aidera à augmenter la fermeté et à améliorer la consistance de tout pain, gâteau, biscuit ou tarte que vous souhaitez préparer.
