RECYCLED ALUMINIUM

The White Line series is made of aluminum for optimum heat distribution across the base and up the sides. The pots, saucepan and pans all have a ceramic coating on the outside and an aluminum rim all the way around the top to protect the cookware.

This means that the cookware withstands very high temperatures and is extremely robust and hard-wearing. The inside of the pots and saucepan also has a hard ceramic coating, while the frying pans and sauté pan have a non-stick coating.

The blade is forged from 67 layers of Damascus steel (10Cr15CoMoV). The complex manufacturing method results in an exquisitely patterned blade offering an outstanding combination of strength, flexibility and durability. The blade hardness rating is an impressive HRC 60 ±2 to ensure long-lasting sharpness and minimal maintenance. The pakka wood shaft sits stably and comfortably in the hand, while the protective quillon doubles as a natural thumb-rest. An indispensable knife guaranteeing full precision and control.

Knife sharpener Eastern
- A perfect match for the knives on the prevoius page

Keep your Japanese knives sharp and extend their lifespan with correct maintenance. The Eastern is custom-designed to match the sharpening angle of Japanese knives, which are distinct from Western knives in having a sharper angle. Whether you need a quick refresh or a more thorough hone, the user-friendly design ensures that your knives attain their renowned sharpness.

515420
Knife sharpener Western

The knife sharpener is equipped with two sharpening functions clearly indicated by an icon – coarse sharpening in metal to restore dull blades and fine sharpening in ceramic to hone the cutting edge of the blade. Also available in a variant to match the sharpening angle of European (Western) knives.
